DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3, 5-10, and 12 are allowed.
2. The following is an examiner's statement of reasons for allowance: With regard to independent claims 1 and 8, prior art fails to teach or suggest a position isolation system, or object location system, wherein an activation means selectively initiates data exchange between a first portable cellular transmitter and an associated tracking station, and additional position information is exchanged through a cellular relay system, to aid in isolating, or determining the specific location of the first portable cellular transmitter within a limited geographic region. In addition, a secondary transmission system, associated with the first portable cellular transmitter, outputs secondary location data, also relating to a position within the limited geographic region, and further generates a location beacon, whose signal strength is a function of the secondary location data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
